CONTENTS

Preface 5

Chapter I. Introduction to Informatics and Technology 7
1.1. What is Technology? 8
1.2. Technological Change and Stages 10
1.3. Technological Approaches and Research-Development 13
1.4. What is Information Technology (IT)? 15
1.5. What are Data, Information and Knowledge? 16
1.6. Knowledge Management (KM) 24
1.7. The Impact of IT on Human Behavior 27
1.8. The Effects of IT on Social Development 30
1.9. Information Technology and Society 32
1.10. Individuals' Needs in Information Society 39
1.11. The Importance of Teaching in Transition to the Information Society 40
1.12. What is Literacy in Information Technologies? 43
Chapter II. Information Technology in Teaching and Learning 45
2.1. What is Computer? What are the Main Parts? 45
2.2. Brief History of Computer 50
2.3. Software 54
2.4. Comparing the Computer to the Human Brain 58
2.5. Computer Ergonomics 59
2.6. What is Computer Literacy? 64
2.7. Computer Network Technology 66
2.8. Wireless Networking Technology 68
2.9. Internet Technologies 73
2.10. What is Internet Literacy? 79
2.11. Cloud Computing Technology 81
2.12. Moodle Cloud Computing Project 85
2.13. Mobile Communications Technology and Smartphones 87
2.14. How is Information Technology Elections Made? 88
2.15. Digital Media Terms 89
Chapter III. Education-Teaching System (ETS) 93
3.1. System Approach in Education-Teaching 96
3.2. Management Information Systems in Teaching Institutions 97
3.3. Management Factors in Teaching Institutions 99
3.4. Education-Teaching System and Marketing 102
3.5. Education-Teaching System and State 103
3.6. Place of Universities in the Education-Teaching System 106

3.7. Expectations of Society and Business from Universities 112
3.8. Contribution of the Education-Teaching System to Career Choice 114
3.9. Contributions of Internet to the Education-Teaching System 117
3.10. IT and Internet Education for Children 118
3.11. Main Problems of Education-Teaching System 120
Chapter IV. Teaching-Communication-Learning Process 123
4.1. What is Education, Teaching and Learning? 124
4.2. Elements of Teaching-Communication-Learning Process 127
4.3. The Goal of Teaching-Communication-Learning Process 132
4.4. Teaching-Communication-Learning Process Design 133
4.5. Teaching-Communication-Learning Process and Communication 137
4.6. Teaching-Communication-Learning Process and Human Brain 143
Chapter V. Instructional Technologies (IT) 149
5.1. Are Education Technologies or Instructional Technologies? 152
5.2. Objectives of Instructional Technologies 153
5.3. Instructional Technology Theories 156
5.4. Instructional Technology Methods and Techniques 161
5.5. Instructional Technology Tools and Equipment 164
5.6. Instructional Technology Environments 168
5.7. Instructional Technology and Student Achievements 169
5.8. Instructional Technology and Evaluation 173
5.9. Reasons for Using Instructional Technology 174
5.10. Virtual (Online) Instructional Technology 176
5.11. Instructional Technology and FATIH Project 178
5.12. Instructional Technology and EBA Project 182
Chapter VI. Information Technology Aided Learning (ITAL) 187
6.1. Is Computer Aided Learning or IT Aided Learning? 187
6.2. Information Technology Management Teaching (ITMT) 189
6.3. Packet Software Used in ITMT 191
6.4. Information Technology Aided Learning (ITAL) 192
6.5. Objectives, Benefits, Limitations and Problems of ITAL 198
6.6. Factors That Affects ITAL Success 202
6.7. ITAL and Hardware 202
6.8. ITAL and Software 212
6.9. Software Development Stages in the ITAL 218
6.10. Software Development Design Principles in ITAL 228

6.11. Software Quality and Evaluation in the ITAL 243
6.12. ITAL and Teacher Training 248
6.13. ITAL and Curriculum-Measurement-Evaluation 255
6.14. ITAL and Care-Repair-Support Services 256
6.15 ITAL and Support Personnel 256
6.16. ITAL Sample Programs 259

Chapter VII. Education-Instructional Policies and Recommendations 261

Epilogue 269
Abbreviations 270
Internet Resources 275
References 277
Curriculum Vitae 287
Other Books by Author 288
